Partnering Global Chemicals and Life Science Companies

BloomchemAG bridges the gap between global chemical producers and end-users, **delivering expertise, reliability, and market-driven solutions** at every step of the supply chain.

Disclaimer

This presentation has been prepared by BloomchemAG (the 'Company'), the content of which was compiled from sources believed to be reliable for informational purposes only. It is based on information regarding the Company and the economic, regulatory, market, and other conditions in effect as of the date hereof. Subsequent developments may impact the information contained in this presentation. Neither the Company nor its advisors or representatives are under any obligation to update, revise, or affirm this information. The contents of this presentation do not constitute an offer or invitation for sale or subscription, nor a solicitation to buy or subscribe for any securities. It should not form the basis of, or be relied upon in connection with, any contract, commitment, or investment decision in India or any other jurisdiction.

Prospective and existing stakeholders, including investors and customers, should independently evaluate the Company, as this presentation does not claim to be all-inclusive or to contain all information that an investor may require. Interested parties should conduct their own due diligence before making any decisions. The Company makes no representation or warranty regarding the accuracy or completeness of this information and assumes no liability for any errors or omissions or for any written or oral communications made during the evaluation process.

This presentation may contain certain "forward-looking statements" based on assumptions and expectations of future events. Actual performance, outcomes, and results may differ materially from those expressed in forward-looking statements due to various risks, uncertainties, and assumptions. Although these forward-looking statements are based on reasonable assumptions, there is no assurance that such expectations will be realized. Neither the Company nor its advisors or representatives are obligated to update forward-looking statements or adjust them to reflect future events or developments.

BloomchemAG commitment to growth & sustainability

Rajesh Sethi, CEO

The European chemical **industry is at a pivotal moment**, navigating rising energy costs, global overcapacity, and sweeping regulatory shifts. At **BloomchemAG**, we see these challenges **not as obstacles**, but as **opportunities to lead**.

Since our **founding in 2013**, we have grown from a focused distribution firm into a **globally recognized supply chain partner, ranked 145th in the ICIS Top European Chemical Distributors**.

Our competitive edge rests on three pillars:

1. **Cost Leadership** - Ensuring our clients always receive the most competitive pricing in the market
2. **Reliable Deliveries** - Delivering with consistency, precision, and accountability every time (**95% customer retention rate**)
3. **Long-Term Partnerships** - Building relationships that go beyond transactions to create shared growth

Looking ahead, our strategy is clear: **expand our European footprint, deepen market intelligence capabilities, and strengthen relationships with "Actual Users" and "Last-Mile Connectors."**

At BloomchemAG, customer-centricity, innovation, trust, and ethics are not aspirational values - they are our operating principles.

“**True leadership is about shaping industries, creating lasting impact, and empowering future generations with sustainable solutions.**”

Introducing BloomchemAG: your chemical distribution partner

BloomchemAG is an acronym which conveys our area of operation and expertise:

Bloom: is flowering and growing,

chem: is from Chemistry,

AG: is from Agriculture

 BloomchemAG was established in 2013 with an objective to increase footprint in Indian subcontinent and conversely support Indian and other Asian specialty chemical producers to scale-up their operations and gain larger share of global markets.

 We are a **Europe-focused chemical distribution and international trading** supply chain company in the field of Specialty Chemicals. BloomchemAG understands **the bridge between “Local Europe” & “Global Trading”**.

 We import and store Specialty Chemicals in major European Ports of **Antwerp, Rotterdam and Hamburg** and distribute to customers in Europe, as per their call-off dates. **We enable our customers to achieve economies of scale** and offer them a **synergy of chemical products and value-added services**.

 We connect **chemical manufacturers (our principals) and chemical users (our customers)** across the world. Our customers and principals / producers know us as a **pro-active company with short lines of communication and quick decisions**.

To streamline European operations, we set up Bloomchemag BV - a wholly-owned subsidiary based in Mol, Belgium, since January 2014.

Strategic overview: driving global success in chemical distribution

Industry-Leading Distribution Solutions

BloomchemAG is a distribution firm **specializing in industrial and specialty chemicals**, serving wide application areas. With expertise spanning diverse industries, we offer strategic **outsourcing solutions to global clients**. We aspire to strengthen our market presence by capitalizing on the robust demand for our products in the West, allowing us to leverage the cost advantages of sourcing from Asia.

Our approach involves **providing tailored product and service solutions** by deeply understanding our clients' manufacturing processes and analyzing their feedstock markets.

Driving Growth and Innovation

BloomchemAG bv is committed to simplifying the complexities of global sourcing and supply chain. With our **top-line revenue exceeding EUR 26 Million**, we have achieved this through our deep understanding of markets, expertise in technical and supply chain operations, and innovative approach to new business and product development. We are **aiming to double our Annual Sales Revenue to EUR 50 Million in the coming 3 years (till 2029)**. We are actively capitalizing on opportunities presented by the continuous outsourcing by European companies from Asia, foreseeing continued high annual growth.

Our vision & mission

Our Vision

To be a Reliable CRAMS player, Outsourcing and Chemical Distribution Partner for Global firms by offering Chemical Products and Services through Required Regulatory and importation, Storage and selling Infrastructure, Business Development, Sales Promotion and Distribution by Providing end-to-end Logistics to Customers' doorstep globally.

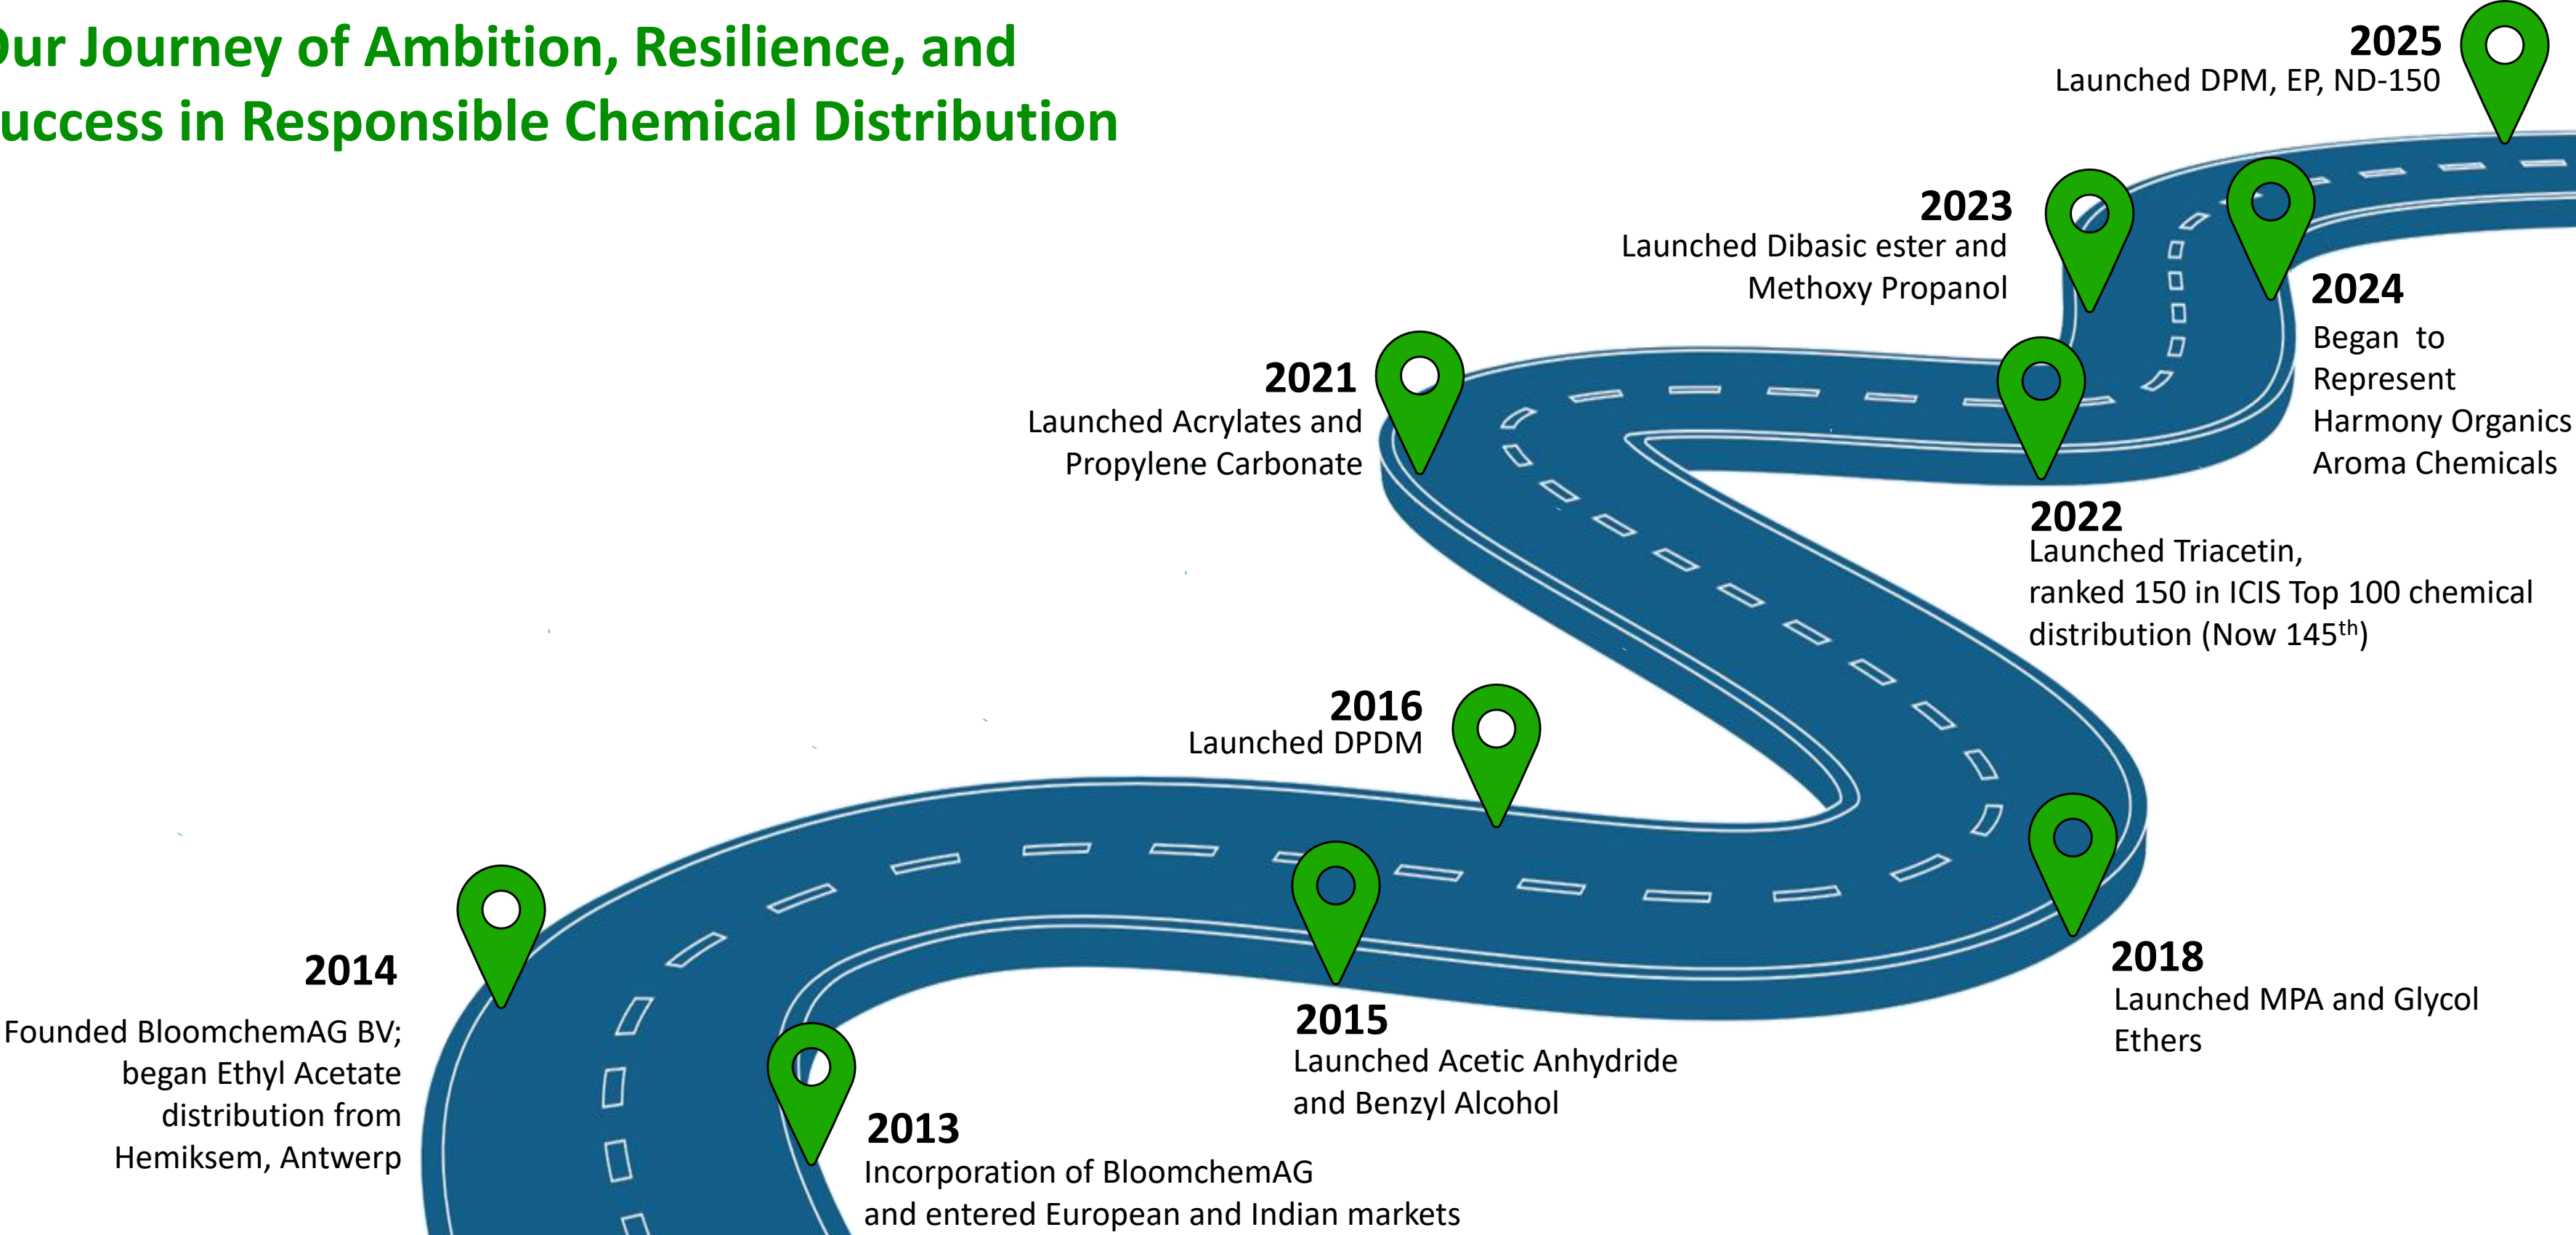

Our Mission

We aim to closely work with global chemical suppliers and create value for them and for our global customers through our knowledge, focus and entrepreneurial approach.

CAGR (2024–2035)

~5.7%

Forecasted growth

Key highlights

The German **chemical and pharma sector generates €220 billion** in annual sales, representing **27% of total EU chemical output** - making it the undisputed centre of European chemical activity.

Germany's specialty chemicals sector is **projected to grow at a CAGR of 5.1% through 2035**, with the focus on fine chemicals, coatings, adhesives, and EV battery materials, areas where German engineering expertise creates a durable competitive advantage.

Key highlights

- Port of Antwerp: Europe's largest integrated chemical cluster
- 60M+ tonnes of chemicals handled annually through Antwerp
- 150+ chemical companies incl. 3 world-scale crackers
- Belgium exports ~60% of its total chemical production

Challenges in European chemical distribution industry

Logistics & Supply Chain Intricacies

- Coordinating a complex logistics chain with diverse sourcing locations
- Strict import requirements poses a significant challenge for the chemical distribution industry.

Sustainability & Environmental Concerns

- Balancing sustainability with regulatory compliance is challenging.
- Navigating the complexities of implementing TQM and HSE systems presents significant obstacles.

High Energy Costs

- The specialty chemicals industry faces rising energy prices, significantly impacting production costs.
- Companies must adopt energy-efficient processes and explore alternative energy sources to remain competitive.

Global Competition

- Competing with established global chemical distributors poses a formidable challenge.
- Addressing barriers to innovation and market expansion presents additional hurdles.

Global Overcapacity & Regulatory Changes

- Excess production capacity in key markets leads to pricing pressures and reduced margins.
- Frequent regulatory updates across regions require companies to continuously adapt to compliance requirements, increasing operational complexity.

Additional Regulatory Challenges:

- German regulations such as EU REACH escalate compliance burdens for chemical distributors, causing complexity and potential fines, disrupting business operations.
- EU REACH mandates supply chain transparency, necessitating the monitoring and resolution of labour and environmental violations.
- Chemical distributors from India, China, and Vietnam encounter hurdles aligning with German regulations and broader EU initiatives like Carbon Border Adjustment Mechanism (CBAM).

Enablers for BloomchemAG's growth

1

Cost Leadership

Optimizing procurement and logistics helps companies offer high-quality products at competitive prices. This ensures sustained profitability, market leadership, and a strong competitive edge in the specialty chemicals industry.

2

Deep & Long-Term Customer Relationships

Building trust, transparency, and responsiveness with customers leads to long-term partnerships. Understanding their needs and providing tailored solutions help drive mutual growth and industry leadership.

3

Reliable Deliveries

Consistent and timely deliveries are crucial for supply chain efficiency. Strong logistics, inventory management, and supplier networks help prevent disruptions and build customer trust.

4

Innovation

Investing in logistics is essential for staying competitive in the specialty chemicals industry. Indian companies must increase expenditure to 10% of revenue by the end of 2025 to drive innovation and technological advancements.

5

Focus on Sustainability

Sustainability is critical for long-term success. Compliance with government regulations and science-backed initiatives will shape industry growth and help achieve climate goals.

Value development for our stakeholders

Suppliers

Strategic Market Entry

Assisting global producers in entering global chemical markets.

Scaling Operations

Supporting global producers to expand and gain global market share.

Market Knowledge Sharing

Facilitating collaborations and market insights.

Efficient Supply Chain

Cost-effective sourcing and logistics management.

Customers

Efficient Supply Chain Solutions

Diverse sourcing and strategic logistics ensure timely deliveries. Sealed-ISO tank containers temporarily stored in Antwerp facilities.

Outsourcing Expertise

Procuring and managing resources for global clients.

Customer-Centric Approach

Most European customers prefer DDP for close-to-requirement purchases, while Non-European are invoiced on CIF basis.

Global Logistics

Operations centered on Europe and Africa. Importing from Asia and strategically serving diverse markets.

BloomchemAG partnered with Asian suppliers and used Antwerp-Rotterdam ports to cut costs and improve working capital efficiency.

Aroma chemical distribution

Exclusive. Reach-certified. Ready for Europe.

Exclusive Partnership for Business Continuity

We have partnered exclusively with Harmony Organics Pvt Ltd to ensure businesses achieve continuity and confidence in their operations.

Readily Available Stock & Flexible Delivery

With readily available **stock in Rotterdam and Antwerp**, we offer flexible packaging and delivery options, including **drums, IBCs, ISO Tanks, and bulk deliveries** for seamless operations.

Exclusive REACH-Certified Distributor in Europe

We're excited to announce that BloomchemAG is now the exclusive distributor of REACH-Certified specialty chemicals across Europe, expanding our portfolio with a new range of Aroma Chemicals.

Stock Ready. Delivery Flexible. Rotterdam and Antwerp inventory available now. Drums, IBCs, ISO Tanks, and bulk formats, your way, your schedule.

Aroma chemicals: flavours & fragrances

Introducing Aroma Chemicals with Harmony Organics

Our Portfolio is expanding to offer you an even wider selection, for our clients already benefiting from our existing offerings, like **Benzyl Alcohol and Triacetin** the addition of “**Aroma Chemicals**” portfolio provides immediate advantages, offering the flexibility to purchase both established and new solutions through a single source. Our expanded selection allows you to streamline your supply chains and achieve quicker turnaround times for orders.

Navigating challenges: A case study in proactive solutions & strategic coordination

The case study highlights how our proactive approach and strategic coordination helped navigate a unique challenge, underscoring company's commitment to delivering results despite adversity.

Product: BISPHENOL A

Problem: Navigating Customs Challenges for Timely Delivery

- **Client & Product:** One large order of Bisphenol A, a vital component with multiple end-users.
- **Stakeholders Involved:** Supplier, Customer, Customs inspection team, Warehouse representative, Gas doctor.
- **Critical Issue:** Customs inspection delay jeopardizing production schedules, customer relations, and supply chain flow.

Solution: A Strategic Roadmap to Success

- **Proactive Engagement:** Our quick response and coordination ensured all stakeholders were aligned.
- **Revised Timeline:** Successfully negotiated a new inspection date from the initially unfeasible date.
- **Precise Execution:** Collaborated with gas doctor to provide necessary gas measurement and certification, a key requirement for clearance and implementing contingency plans.

Benefits: Delivering Value Beyond Expectations

- **Timely triumph:** Ensuring uninterrupted operations
- **Trusted Collaboration:** Strengthening Global Partnerships
- **Exceptional Relationship Building:** Enhancing Client Satisfaction

Sustainability initiatives

Comprehensive Commitment to Safety and Compliance

At BloomchemAG, safety and compliance are central to our operations, guided by TQM.

Our ISO 9001:2015 certification demonstrates our commitment to standardized processes and global compliance.

Global Responsibility and Ethical Engagement

At BloomchemAG, products spanning 1,000,000 global miles annually, we prioritize environmental responsibility, health, and safety for our supply chain.

Our memberships in DUN & BRADSTREET and ZENITO highlight our commitment to global citizenship, social security, and community support.

Compliance Assurance

At BloomchemAG, our policy strictly involves dealing only with the products that adhere to the REACH regulations and other applicable regulations.

BloomchemAG has pre-registered all the chemicals in its current portfolio which are mandated to be registered under REACH.
